Work Experience

CRM Developer @ Tata Consultancy Service, [Link](#) Thane

Sept 2024 - Present (7 months) | Full-time

- Saudi telecom Company (STC) objective of project is deliver changes request for the new bilings and customer care system.
- The project involves impact assesment and implementation of changes to siebel (customer relationship Management) .
- The objectives of STC projects are implementing IT process change as per the new change requests based on the business process change of customer line of business.

Skills Developed: Javascript, OracleDB, PLSQL

Tagline

Driven by curiosity and passion, I transform challenges into opportunities through code. As a full-stack developer, I strive to build impactful solutions, create meaningful digital experiences, and push the boundaries of technology

Skills

HTML | CSS | Javascript | React.js | Java | MongoDB | NodeJs | ExpressJs

Projects

Url Shortener Management System [Link](#) [Video](#) [Code](#)

- I built a URL Shortener & Management Platform using the MERN stack to help users create, manage, and track shortened links
- Users can monitor link performance with detailed insights on clicks, locations, and devices
- The platform includes click analytics, user authentication, custom aliases, and link expiration for efficient link management.
- Designed an analytics tracking system to capture clicks, device information, browser details, and timestamps, presenting actionable insights through a responsive dashboard.

Skills Developed: React.js, Javascript, NodeJs, MongoDB, ExpressJs, HTML, CSS

FormBotAI [Link](#) [Code](#)

- FormBot AI is a dynamic MERN stack application designed for managing forms and user profiles with AI-enhanced features. Users can sign up, log in, and manage their profiles by creating, deleting, or updating them
- It allows seamless form creation and deletion, empowering users to build custom forms for data collection. Additionally, FormBot AI enables form sharing with others, offering real-time response tracking and analytic
- This provides a powerful tool for both personal and professional use, offering ease of access and an intuitive interface.
- Implemented link sharing with response tracking, analytics, user engagement metrics, and detailed logs of time, entries, and completion status

Skills Developed: React.js, Javascript, NodeJs, MongoDB, HTML, CSS

Education

Fr. Conceicao Rodrigues College of Engineering

B.E., Computer Science Engineering (CSE) | 8.55 CGPA

2020 - 2024

B.N.N COLLEGE

Class XII | 8.9 CGPA

2020 - 2020

P.E.M HIGH SCHOOL

Class X | 9.4 CGPA

2018 - 2018

Certifications & Courses

Sparks Foundation

- Successfully Completed my internship in sparks foundation

August 2022 | [Certificate Link](#)

Cuvette Fullstack Development Certificate

- The program likely included frameworks like React, Node.js, and database management with SQL or MongoDB. It strengthened your problem-solving skills and ability to develop scalable, end-to-end solutions.
- Designed and built interactive user interfaces using components, state management, and event handling to deliver dynamic and responsive web experiences.

January 2025 | [Certificate Link](#)

Core Java Certification

Pocket Notes_App

- Developed a responsive web app for instant information storage, allowing users to add, manage, and delete notes effortlessly
- Features include creating and managing note groups, selecting custom colors
- Users can create multiple notes with titles and content, with seamless deletion of individual notes without impacting others.

Skills Developed: HTML, CSS, Javascript, React.js

Rock Paper Scissors

- The primary goal of this project was to create an engaging and modernized version of the classic rock-paper-scissors game
- the game logic was implemented to include a challenging computer opponent in single-player adaptive decision-making to keep the gameplay dynamic.
- The aim was to provide players with a fun and interactive experience while preserving and excitement of the original game.

Skills Developed: HTML, CSS, Javascript

- Successfully completed a Java certification course, gaining a solid understanding of core Java concepts, object-oriented programming, data structures, algorithms, and application development.

December 2021 | [Certificate Link](#)

Achievements/ Extracurricular Activities

- I took part in many National Level Hackathons example Kavach Hackathon,, Cresendo , Stratagem Hackathon etc.
- I was a Marketing Head since last two years in CSI(computer Society of India) and I learnt New Marketing Skills which help me to enhance my skillset as well.
